LINCOLN, ILLS, MAY 21, 1879.

The committee, to which was referred the question of the law in relation to the determination of the question of insanity, report the following resolutions:

Resolved, As the sense of the Illinois State Medical Society, that the forms of law adopted for establishing a question of crime are unsuited to the determination of a question of insanity, on account of the exposure to public curiosity and the supposed disgrace attending a trial by jury, and that this mode of procedure should be reserved for the cases in which it is requested by the parties who are suspected of being insane, or by the friends of such parties, and who are desirous of establishing, by such means, the mental soundness of the person in question.

Resolved, That the bill now pending in the legislature of the State of Illinois, entitled, "An act to revise the law in relation to the commitment and detention of lunatics," meets with the hearty approval of the Illinois State Medical Society, and that in the interest of humanity, and for the credit of our State, this Society respectfully prays that the Legislature of the State of Illinois will speedily adopt the provisions of said bill as the law of our State.

House Bill No. 447, a bill for "An act making appropriations for the construction of a chapel and hospital at the Illinois State Penitentiary; for renewing the roofs of the warden house, cell houses and shops of the Illinois State Penitentiary, and for construction of apparatus to properly heat and ventilate the cell houses of said penitentiary." having been read at large a third time, was taken up.

Mr. Wilson, from the special committee to examine machine ventilation in the Joliet Penitentiary, made the following report:

To the Honorable, the Speaker of the House of Representatives of the Thirty-First General Assembly:

The committee to examine into the necessity of a system of machine ventilation to the health of the prisoners in the Joliet Penitentiary, and to report upon the best terms upon which such machinery can be obtained by the State, have the honor to make the following report:

They proceeded on Tuesday the 20th inst., to Joliet, and with Doctor H. A. Johnson, of Chicago, Mr. Smead, of the Rutan Ventilating Company, Doctor Campbell, physician, and Major R. W. McClaughey, warden of the penitentiary, made a careful inspection of the cell houses in said penitentiary.

It is apparent from the reports of the penitentiary commissioners, that the absolute necessity of some further ventilation than the original construction of the cell houses produced, has been for a long time past, realized by the physician in charge.

Doctor Helse, in his report made in 1876, says: "It is a well recognized principle of hygiene, and one carefully observed in all well regulated hospitals, that about 1,000 to 1,200 cubic feet of air are absolutely necessary for the health of each individual. In the present crowded condition of this institution. The capacity of the cells and cell houses afford but 465 cubic feet of air to each convict. Add to this the fact of the imperfect ventilation of the cells which were originally calculated to accommodate but 900 convicts instead of the present number of nearly 1,600, and when it is considered that the heavy stone walls accumulate moisture and thus acting as a prolific cause of tuberculosis disease, especially in cases of scrofulous diseases.

It seems to me therefore that common humanity towards these unfortunates incarcerated here, requires a prompt and immediate remedy of these evils."

He further says in a report dated September 20th, 1877:

"Referring to my last annual report as physician of this penitentiary, I feel called upon, in the interests of humanity, to again direct your attention to that portion of the report which relates to ventilation of the cells. Since that paper was written my experience has fully confirmed the views therein expressed. I find that those diseases which originated from, and are aggravated by bad ventilation, are steadily increasing, with a prospect of still further and more rapid increase in the future.

The number of convicts is now considerably larger than when my report was presented, and if I was then correct in my representations of the utter inadequacy of air supply, how much more is that the case at present. It is my professional opinion that unless improvement is made in this regard, and that promptly, serious results will follow, and it is impossible for me to guarantee even a reasonable condition of health unless the ventilation is immediately increased; such action is an imperative duty, which the state owes to these unfortunates, even did not the voice of common humanity cry out loudly against the present condition of affairs in this respect."

The committee have taken pains to ascertain the professional reputation of Doctor Helse, and are satisfied that his statements are entitled to the greatest respect.

The original construction of the cells in the penitentiary was such that each cell would, when occupied, contain about one hundred and ninety-six (196) cubic feet of air, less the amount displaced by the furniture and occupants, a supply wholly insufficient to maintain a single adult in a healthy condition unless renewed at the rate of about one thousand (1000) cubic feet per hour, but as the number of prisoners has for several years greatly exceeded the number of cells, it has been necessary to place two men in many of the cells. Including the air in the corridors of the cell houses, Doctor Helse stated the amount per prisoner to be at the time he made his report in 1876, four hundred and sixty-five (465) cubic feet, but this air could not freely circulate in the cells. The outside windows of the cell houses are of such a size and so placed that a proper ventilation of the corridors cannot be had through them.

Without the aid of some mechanical contrivance to force fresh air into the cells from the outside their proper ventilation, as constructed, is in the opinion of the committee, an impossibility. The cells are built in tiers standing back to back four and five stories high, and the old system of attempted ventilation consisted in a small flue from the roof down through the partition wall with an aperture at the top and bottom of each of the eight or ten cells, separated by the partition wall.

It was apparent to the committee, that this system should hardly be dignified by the name of ventilation, and under certain conditions of atmosphere would simply carry the foul air from the upper tiers of cells and deposit it in the lower tiers.

Doctor Johnson unhesitatingly pronounced it utterly inadequate, under the prison regulations, and from necessity, one and sometimes two prisoners are confined daily for twelve consecutive hours in each cell, and in one or the other of the cell houses, the inmates are confined in their cells from Saturday nights until Monday mornings.

It is the opinion of the committee, that the best and probably the only method of properly heating the cells, is by forcing heated air into them through registers, controlled by the inmates.

Your committee found a heating and ventilating apparatus, constructed and in operation upon the premises, after a thorough inspection and test, they are of the opinion that it is capable of properly heating and ventilating the cells, and the warden and physician informed them that it met the demands of the coldest weather of the last past winter.

The physicians who made the examination and test with the committee, concur with them in their opinion but suggest the necessity of taking any air supply taken from the interior of the cell houses from a higher point by means of a stand pipe or otherwise.

The committee are informed that the apparatus referred to, was placed in the penitentiary under a contract and specifications, copies of which are attached hereto.

Mr. Smeed stated to the committee, that he considered the apparatus referred to, successful in its operation, and that the sum named in the specifications attached to-wit:

Ten thousand nine hundred (\$10,900) dollars, was a reasonable price for the same, and the committee, after an examination of an itemized statement of the cost of its construction, are convinced that the sum named would not allow more than a reasonable profit to the contractor.

In conclusion, the committee report that in their opinion, some means of forcing into each of the cells of the Joliet Penitentiary, from one to two thousand cubic feet per hour of air taken from outside of the cell houses, and heated to any desired temperature, is an absolute necessity to the health and comfort of the prisoners, whether one or two be confined in each cell, and that the State cannot obtain that result at an expenditure of less than from ten to eleven thousand dollars.

BENJAMIN M. WILSON, Chairman.
JOHN M. PEARSON.

Copy of proposal of A. L. Ide, to warm and ventilate the State Prison, at Joliet, Ill.:

To the Commissioners of the Joliet State Penitentiary:

GENTLEMEN: For the sum of ten thousand nine hundred dollars (\$10,900), I propose to furnish all material and labor, to construct, erect and put in successful operation, a steam warming and ventilating apparatus, of sufficient power and capacity to thoroughly warm and ventilate each and all of the 900 cells in the east and west wards, in a good, thorough, economical and satisfactory manner, at all times, when the thermometer is 30° below zero, or 100° above.

In each ward there will be one of Sturtevant's steam fans, size No. 14, with ten-horse power engine attached, and capable of discharging 40,000 cubic feet of air per minute, if run at the maximum capacity, or 20,000 cubic feet of air per minute if run at a moderate and economical speed, and as the 540 cells in the west ward contain 100,000 cubic feet of air, the entire air in each cell will be changed every five minutes, when running the fan at a moderate speed; and, estimating 1,000 persons in each ward, it will furnish 1,200 cubic feet of air per hour for each, and as 1,000 cubic feet per hour is considered the maximum amount required by any of the best authorities, and many claim 500 to be sufficient, therefore, to avoid unnecessary ventilation, I propose to have two supply pipes to the fan, one to take fresh air from outside of building, and one to take cold air from near the floor inside of the building. Each of these supply pipes will be furnished with valves, so any portion of the air can be taken through either pipe.

A message from the Senate by Mr. Haws, assistant secretary:

Mr. Wentworth presented the following protest:

To the Speaker of the House of Representatives of the Thirty-first General Assembly:

The undersigned, members of the House, respectfully protest against the action of the House, upon May 23rd, 1879, in relation to Senate Bill 149, entitled a bill for "An act making an appropriation for the Illinois State Penitentiary, at Joliet."

That part of the bill that makes the appropriation reads:

"That for the purpose of paying the debts of the Illinois State Penitentiary, the sum of forty-three thousand five hundred and fifteen dollars and fifty cents (\$43,515 50), or as much thereof as may be necessary, be and is hereby appropriated to pay the indebtedness of the penitentiary contracted before the first day of October, A. D., 1878."

By the act entitled "An act to provide for the management of the Illinois State Penitentiary, at Joliet," approved June 16, 1871, there is appropriated the earnings of the convicts of the penitentiary, to defray its expenses.

The law contemplates an appropriation, in advance, from the state treasury, if needed, to supply any probable deficiency of the earnings to support the penitentiary. The last General Assembly, in providing for the ordinary and contingent expenses of the state government, in pursuance of section 18, article 4, of the constitution, made no appropriation for the Illinois State Penitentiary, beyond the earnings. It seems, the penitentiary has failed to confine its expenses within this appropriation, but by this bill, seeks to obtain \$43,515 53, to pay indebtedness contracted before the first day of October, A. D., 1878. It would add this sum to the aggregate amount of the appropriations provided by the last General Assembly for the expenses of the state government until the expiration of the first fiscal quarter after the adjournment of this session of the General Assembly.

Section 18, of article 4, of the constitution, reads in part, as follows:

"Each General Assembly shall provide for all the appropriations necessary for the ordinary and contingent expenses of the government until the expiration of the first fiscal quarter after the adjournment of the next regular session," the aggregate amount of which shall not be increased without a vote of two-thirds of the members elected to each House.

The undersigned are of the opinion that all appropriation bills that provide for an expenditure of money not authorized by the last General Assembly, and that are for the payment of an indebtedness contracted since the adjournment thereof, and before the expiration of the first fiscal quarter after the adjournment of this General Assembly, are an increase of the aggregate amount of appropriations provided by such last General Assembly for the ordinary and contingent expenses of the government, in pursuance of section 18, of article 4, of the constitution, and require a two-thirds vote of all the

members elected to the House before they shall be declared passed; and that this Senate Bill 149 is one of such character.

The undersigned therefore protest that it requires 102 votes to pass this bill, and that it has not passed the House by a constitutional majority.

It will be observed that when the Speaker of the House declared that the bill had passed by a constitutional majority, upon an appeal from his decision, he was sustained by only 76 votes. The opinion of the Speaker that the bill had passed by a constitutional majority, was not sustained by the 77 votes required to pass a bill of any character through the House. It is thus apparent that it was the intent of the House to pass the bill as providing for a deficiency in the appropriations of the last General Assembly, or not at all.

But what is the condition of the bill, if by any possibility, the provisions of section 18, of article 4, of the constitution, do not apply to it, and, as was held by the Speaker seventy-seven votes is a constitutional majority to pass the bill. The bill appropriates \$43,515.53 to pay indebtedness contracted by the penitentiary commissioners before the first day of October, 1878.

Section 43, of the act entitled "An act to provide for the management of the Illinois State Penitentiary, at Joliet," approved June 16, 1871, reads: "The commissioners and the warden of said penitentiary, are hereby forbidden to contract any debt on behalf of the State, beyond the amount of the appropriation made by the General Assembly, and if the said commissioners, or either of them, or the said Warden shall contract any debt on behalf of the State, beyond such appropriation, such contract shall be void, and said commissioners and their sureties, or said warden and his sureties, shall be held liable to pay such debts. By this statute the penitentiary commissioners, and warden, were not only without authority of law, but, expressly forbidden to contract these debts in excess of the appropriation, section 19, of article 4, of the constitution, among other things, declares: "The General Assembly shall not authorize the payment of any claim or part thereof, hereafter created against the State under any agreement or contract made without express authority of law, and all such unauthorized agreements or contracts, shall be null and void," that the General Assembly is prohibited by the constitution from paying these debts which have been created without authority of law, and in violation of the statute above quoted.

If the Senate Bill 149, is viewed as other than a deficiency bill, the undersigned protest that it is unconstitutional and void.

MOSES J. WENTWORTH,
ANDREW HINDS,
WM. R. PRICKETT,
THOS. BUTTERWORTH.

Mr. Latimer, from the committee on public charities, made the following report, the committee on public charities, to which was referred the following resolution, to-wit:

WHEREAS, Repeated complaint has been made by John Colvin, of Ford county, Illinois, of the cruel treatment of himself and others by some of the attendants in the employ of the Insane Asylum at Jacksonville, Illinois, while such persons were therein as patients; therefore, be it

Resolved, By the House of Representatives of the General Assembly of Illinois, that a special committee of five be appointed to investigate the treatment of the patients therein, or discharged heretofore, and of the treatment of said John Colvin, or of any others, where complaint is made of cruel treatment by any person in, or connected with, any of the asylums, and report the same to the House.

Respectfully report as follows, to-wit:

That pursuant to said resolution and the instructions of the House, your committee proceeded to investigate the charges in said resolution set forth. That your committee caused to be taken the evidence of witnesses at the asylum at Jacksonville, on behalf and in the presence of said Colvin, that, after making the most thorough and searching investigation respecting all of the charges of cruelty, and after hearing all the evidence in the case, your committee is of the opinion that the charges of cruelty are not sustained, but that, on the contrary, in the general management of said insane asylum, there appears to be exercised a wise discretion, and, in the care of the inmates thereof, the most humane treatment.

SIR: Your special committee, appointed in conformity with the above resolution, would respectfully report that they have had the matter under consideration, and devoted much time and labor to the investigation of the grievances alleged to have been suffered by Mr. Hayde, the complainant. We have deemed it advisable to submit, with this report, a portion of the record of proceedings had by this committee, in order that the House may have a clearer understanding of the case, we, therefore, lay before you the evidence taken, that full justice may be done both parties to the controversy.

A majority of your committee believe that the parties employed in the various capacities as inspectors are competent, and men of long experience, and are, doubtless, as well qualified for their respective positions as could reasonably be expected.

We find that as a rule, great pains is taken by the inspection department, to see that the business of the same is conducted to protect alike the interest of the shipper and receiver; yet notwithstanding this fact, there does appear to this committee, from the evidence taken, that the shipper in this case Mr. Hayde, had some ground for complaint: that in view of all the facts before the Chief Inspector (Mr. Reynolds), he should have used greater exertion in seeing that the interests of the shipper, in this case, were properly secured. As will be seen from the testimony, much of the trouble occasioned, might have been averted, had the chief inspector informed Mr. Bogue, of the railroad and warehouse commission, of the difficulty with Mr. Hayde, as your committee are led to believe that the railroad and warehouse commission can, by a proper supervision of the matter (as they have shown themselves ready and willing to do), furnish in many instances, the relief that may be necessary in such cases.

Your committee would state that they went in person and examined the corn in car No. 780, but inasmuch as a portion of them did not claim to be sufficiently expert to determine upon the proper grading of the grain, concluded to request the presence of the railroad and warehouse commission, and the chief inspector, and assistants, and in justice to these gentlemen, we would say that they promptly responded and willingly answered all our interrogations.

From a personal examination of the corn, and from the facts adduced, a majority of your committee would give it as their opinion that the original inspection was correct, the minority dissenting from this view. It is evident to your committee, from the testi-

mony taken, that the car of corn in question, was a "line" car, and that during the germinating season, there is a large percentage of such corn: therefore your committee would respectfully recommend that another grade of corn be established, to be known as grade "No. 3," and that all corn should be placed in this grade that is better than rejected "or new high mixed," and not sufficiently dry for "No. 2," or "high mixed."

JOHN T. McBRIDE, Chairman.

M. H. PETERS,

D. W. CLARK, Jr.

A. G. SCOTT.

EXAMINATION OF MR. HAYDE.

- Q. When was the corn shelled?
 A. Friday forenoon, April 11.
 Q. What kind of cribs was the corn in?
 A. Ordinary cribs, 10 feet wide, well covered.
 Q. Where was this?
 A. Belleflower, on the I. C.
 Q. When did you ship the corn?
 A. It reached Chicago Saturday, April 12, at 10 o'clock.
 Q. When was it inspected?
 A. Same day; the certificate is No. 8,918, the number of the car, 780; graded "new high mixed." The certificate was not issued April 14, when it bears date.
 Q. The inspection was not satisfactory?
 A. No, sir; I took an appeal, and to my surprise, Messrs. Dater & Seymour sustained the inspection, while Mr. Foss, however, did not, but said it was not properly graded. I then concluded to ship down here and submit to you, gentlemen.
 Q. How much did you ship from Belleflower?
 A. Sixty cars, of which No. 780 is one.
 Q. What did you expect to accomplish by submitting to the legislature?
 A. I thought I would do a good thing for the people. I felt a great injustice done me, and I wanted to call the attention of the Legislature to the reckless manner of inspection.
 Q. What, in your opinion, ought the committee to do?
 A. I think that they ought to grade this corn (sample exhibited), "high mixed," according to the rules. It is clean, sound and dry.
 Q. Where do you ship mostly?
 A. To the Mediterranean coasts.
 Q. How long have you been in the grain business?
 A. For 20 years, 11 of which I was an inspector, 5 years under the present system.

STATEMENT OF MR. BUCKLEY, ASSISTANT INSPECTOR.

Found car No. 780, not sufficiently dry to grade it "high mixed," and so graded it "new high mixed." Have been employed as inspector for 7½ years. Car was all right, except in not being dry enough, test by smelling it, pinching the chits out of it. Dry corn has an Indian meal smell. Graded the corn "new high-mixed--soft." I inspect corn out of the elevators as well as in. Corn coming out now is very good, indeed.

INTERROGATORIES OF MR. HAYDE TO MR. BUCKLEY.

- Q. Do you know of having 10,000 bushels of "rejected" corn being shipped from the Central Elevator, Friday or Saturday of last week?
 A. I know of corn being shipped as "rejected" corn that day. Don't know as to amount. Mr. Walker, 3d assistant, asked me to go and see the corn, also Mr. Saunders, agent for Wm T. Baker, the shipper. They asked my opinion of the corn, I replied it was green. There was a smell on it I didn't like.
 Q. What was the cause of their calling your attention to that particular lot of corn which was going out?
 A. By a particular request of my own, that I might know how the corn was running out.
 Q. You having inspected that corn once, and giving your reasons for doing so, why did you go again to re-examine it when it went out? Were any remarks passed by other parties, calling for your interference in the matter?
 A. We had not shipped any corn for some time from that particular A house. I wanted to see how it was going to turn out. As I said before, I requested that I might see it for my own benefit. I was not called on to do it.
 Q. Are you aware of my vessel at present in the Chicago river, in which there is hot "No 2" corn?
 A. No, sir, I am not.
 Q. In marking the word "soft" how do you explain it?
 A. Corn not sufficiently dry for "high mixed," or "No. 2."
 Q. When you find a car load of corn "new high mixed," and giving as a reason for such grade, that it was "soft," how long do you think such corn must remain in a car to be "high mixed"?
 A. I don't know.
 Q. After car No. 780 was shipped to Springfield, was there any member of the force called upon you and requested that you would look out for the car upon its return?
 A. No, sir.

INTERROGATORIES OF MR. SCOTT TO MR. BUCKLEY.

- Q. Is it possible in the winter season, to tell the exact condition of corn when it comes in, whether it is frozen or not?
- A. Yes, I can.
- Q. What is the cause of this "No. 2" corn being out of condition?
- A. I don't know.
- Q. Isn't it unusual for "No. 2" to be out of condition at this season of the year?
- A. It is not unusual to find corn when you are shipping "No. 2," to find it out of condition?
- Q. Who told you this bin of "No. 2" corn was out of condition?
- A. Thomas Porter, 2d assistant inspector.
- Q. Did he tell you the grade when it was put in?
- A. He did not.
- Q. Do you know of any "No. 2" hot corn in any of the elevators in Chicago?
- A. I do not.
- Q. Do you know of any in vessels, loaded with corn that was drawn out of the Central, or any other elevator, this spring?
- A. I don't know of any.
- Q. Did you inspect car No. 780?
- A. I did.
- Q. Did you inspect car No. 3,048?
- [Car No. 3,048 contained the same corn transferred from car No. 780, and shipped back to Chicago in the name of another party.]
- A. I did.
- Q. What condition was it in?
- A. I found it in a "line" car—4. e., on a line between one grade and another.
- Q. What was the difference, in condition, between car No. 780 and car No. 3,048?
- A. There was not a great deal. Car No. 3,048 was a little drier; a little better.
- Q. Do you believe that a bin of corn like car No. 3,048 will keep dry during the months of May and June?
- A. It depends on circumstances.
- Q. What are the circumstances?
- A. If it is warm, muggy weather, the corn will be out of condition.
- Q. Do you inspect corn to keep in all kinds of weather?
- A. A reasonable length of time.
- Q. What is a reasonable length of time?
- A. Thirty days. I answer this question with reference to Car No. 3,048, at this season of the year, being a "line" car.
- Q. Do you not know, as a fact, that a "line" car of corn, put in a bin of dry corn, will injure "No. 2" corn in thirty days?
- A. Not if it is handled.
- Q. Is corn handled, in Chicago once in thirty days?
- A. Yes; oftener, in hot weather; handled as often as once in forty-eight hours. By handling corn, I mean that it is run down and up through the elevator, to let it get the air.

INTERROGATORY OF MR. DATER TO MR. BUCKLEY.

- Q. Would not the transfer of this car of corn to Springfield, shoveling over and shipping it back, change the grade of the corn?
- A. It would, no doubt.

INTERROGATORIES OF MR. FOEBENDER TO MR. S. D. FOSS.

- Q. Are you a member of the Appeals Board?
- A. I am.
- Q. Did you examine car No. 780?
- A. I did.
- Q. In what condition was it?
- A. It was a "line" car, and I gave the benefit of the doubt to the corn.
- Q. Did you smell of it?
- A. Yes; it smelled sweet and sound.
- Q. What grade should it have been graded?
- A. "High mixed."
- Q. Did the other members of the Appeals committee examine the car in your presence?
- A. Yes, sir.
- Q. What reason did they assign for not grading it "high mixed?"
- A. They voted separate on it.
- Q. Give the committee the difference in value, of "high mixed" and "new high mixed soft."
- A. About one cent a bushel, at that time.

INTERROGATORIES OF MR. HAYDE TO MR. FOSS.

- Q. Was your attention called to other cars on the track, that day, of the same lot of corn, graded "new high mixed," that he pronounced drier corn?
- A. Yes, sir; one car.

INTERROGATORIES OF MR. REYNOLDS TO MR. FOSS.

Q. Are you a member of Foss, Strong & Co.?

A. Yes, sir.

Q. Is your brother, M. H. Foss, a member of that firm?

A. Yes.

Q. Are you a large receiver of grain in Chicago?

A. Yes.

Q. Have you any corn bought and cribbed in the country?

A. Yes.

Q. Where?

A. Dunlap, Iowa.

Q. Are you afraid to shell it and handle it?

A. We would lose money. Prices are too low. It is dry enough to be "No. 2" now

MR. LYMONIS' STATEMENT.

Am a grain broker; have been for 19 years; in the examination of this car; I gave it a thorough investigation; found it too green to grade higher than given; not dry enough; was a little to soft; we are in the habit, in arriving at a decision, of making a mark independent of each other; the appeals committee knew what the inspection had been; do not know who called it; act independent of any previous inspection; we act on our own judgment; we give the grain the benefit of the doubt; don't always; would be unjust sometimes, as in the case cited by Mr. Buckley; did not have any doubt about this car being "new high mixed"; do not think it is a "line" car, is a little below the line; am not interested in the shipment of corn, and haven't been for 10 years; am not interested in any manner with any one, for or against, grading grain; have been on the committee of appeals two years; have been handling grain for 19 years; do not give the benefit of a doubt at this season when it is green, on its keeping condition, over its quality.

MR. DATER'S STATEMENT.

Am a member of the Appeals Board; am a commission merchant; examined car 780; agreed with Mr. Seymour; corn smelled damp; had doubts about the car; could pinch kernels in two in my fingers; a large part of it was "No. 2" corn. My opinion on the matter is practically the same as Mr. Seymour's; don't determine by weight alone.

MR. MORELAND'S STATEMENT.

I shipped some of this corn; shipped car 780; was of uniform quality; taken from same cribs; think it all should have graded; was clear, in good condition; have been in the business 8 years; cribs new, well protected, except a little at one end; bought the corn of farmers in large lots; was extra fine yellow corn; could not have been more than one car of corn in the bad end; this corn was shipped by two parties—myself and Mr. Pumphelly. I shipped 33,000 bushels and Mr. P. 25,000 bushels. It rained during the time of shelling this corn; were two heavy rains; laid up one day on account of it; understood it was going to Cairo.

(Mr. Steele, a grain shipper at Weedman Station, appeared before the committee, and complained of the manner in which his grain had been inspected in Chicago, and asked that the error be corrected).

MR. REYNOLDS' STATEMENT.

Am chief inspector of grain in Chicago. Car No. 780 took the regular course prescribed Was inspected by Mr. Buckley. Hayde appealed. First assistant inspector reports appeals. He examined the corn; confirmed the inspection of Buckley. The appeals committee passed on it as stated. Appeals committee are members of the Board of Trade. They are the court of final resort. Their interpretation of the law is final to me. Useless for the inspectors to hold out against the rulings of the appeals committee. Buckley is a very fair and a very liberal inspector. Is so regarded by the whole force and trade. He was very candid in his inspection of car No. 780. Don't know corn along the Illinois river now goes to Peoria instead of to Chicago, unless they regard the corn not in the condition to pass inspection. Don't care to speak of the mode of inspection in Peoria. Don't know what the standard of inspection is in Peoria. Think there is no fixed standard. Don't wish to criticize Peoria inspection or elsewhere. The Illinois river producers need not fear the Chicago inspection. Can sell by sample on track. Can be done almost constantly. Nothing in the way of a free, open sale of grain in Chicago. Can sell by sample at all times. Had car No. 780 been transferred to a New York car and aired, as in the transfer to car No. 3048, its condition would have been improved to the same extent. No extra expense in getting a special bin for any size lot. May be times when they can't do it for want of ability to do so. No warehouse likes to post hot corn. Hence the gratuitous handling. No one can buy a bin of "new high mixed" corn. We are instructed to be familiar with the quality and grades. Different qualities and grades must be mixed that all may be dealt with fairly. In running out grain low and high qualities of the same grades must be mixed to average fair. (Here Mr. read the law on the duties of warehousemen.) The oldest receipts suffer

in case of heated grain; the law fixes it; grain loses its identity when it goes into the elevator; corn can be inspected as often as it passes out on a receipt; must actually pass out to receive it; no grain can be run out except on cancelled receipts; warehousemen have the power to invoice grain in elevators; the ratio of appeals to inspection is 4-1,000 of 1 per cent; there were 222,940 cars received during the past year, and there were 916 appeals. Of the appeals, five-eighths were sustained and three-eighths were raised; the inspection department do not approve nor disapprove special bin arrangements, having nothing to do with it; law does not discountenance special bin arrangements; a buyer purchases warehouse receipts, on those receipts he is entitled to receive the average of the grade in the warehouse issuing them; high and low qualities of the same grades are mixed to give the shipper on the out inspection an average quality of the particular grades his receipts call for, to establish and maintain a uniform standard for exportation, so that a man in Liverpool, ordering Chicago "No. 2" corn, ordered on the basis of a standard sample furnished by the department in Chicago, shall receive, as nearly as may be, the quality as represented by that sample.

STATEMENT BY GEO. M. BOGUE.

Am Railroad and Warehouse Commissioner, residing in Chicago, and, as such commissioner, go daily, at 11 a. m., to the office of chief inspector. I have, under an understanding with my colleagues, supervision of the grain inspection department; knew nothing of car No. 780 until I saw in the daily papers of Chicago that Mr. Hayde was dissatisfied with its inspection, and had sent the car to Springfield to be reinspected by the Legislature; regret that Mr. Hayde did not tell me that he felt injustice had been done him by the inspection department; had he done so, I would have telegraphed Commissioners Smith and Oberly to come to Chicago, and we would have thoroughly investigated the complaint, with the view, not only of doing justice to the party feeling himself aggrieved, but to correct the error, in case an error had been made, in the inspection of car No. 780, and also to provide against its recurrence. On Monday following the week Mr. Hayde was in Springfield with car No. 780, he came to my office, and not finding me there, followed me to the inspection office upon information given him by my clerk; he complained to me of the inspection which had just been made of ten cars, six of which had been graded "high-mixed," one "No. 2," and two "new high-mixed." He claimed that the two cars, graded as "new high-mixed," ought to have been graded as "high-mixed," there being no difference in the quality of the grain. I asked Chief Inspector Reynolds and Assistant Inspector Link (who during that week had supervision of the Illinois Central track, to go with Mr. Hayde and myself and examine the cars in question. (Let me here say, by way of explanation, so that this matter will be clear to the committee that the trouble about car No. 780 occurred during the time Mr. Parker, the first assistant was supervising the Illinois track, and Mr. Hayde had expressed his dissatisfaction with Mr. Parker's fairness and ability.) Every two weeks Mr. Parker had supervision of the tracks on the north side of the city, and Mr. Link of those on the south side; then Mr. Parker goes for two weeks to the south, side and Mr. Link for two weeks to the north side; we have established this rule for the purpose of giving evenness to the grading throughout the department, believing that there will be less probability of the inspectors on the different tracks or the first and second assistant supervisors running into a rut if they are thus changed about. Mr. Hayde had, as I have remarked, expressed dissatisfaction with Mr. Parker, who sustained the inspection on car No. 780, but had confidence in Mr. Link, who was then supervising the track on which stood the two cars complained of by Mr. Hayde. As I have said, I asked Mr. Reynolds and Mr. Link to go with me and Mr. Hayde and look at the two cars that Mr. Hayde claimed had not graded according to the merits of the grain in them. We found the cars on the track in the warehouse ready to be elevated; took a sample from each of the two cars and also from some of the other cars, which had been graded as "high-mixed," which samples were thoroughly examined by Reynolds and Link, who sustained the inspection of track Inspector Buckley, and both gave as their reason for sustaining the inspection that a portion of the corn in the two cars referred to was not dry enough to permit of its being inspected as "high-mixed." Mr. Hayde, who was present, admitted that the samples of grain in the six cars that had been graded as "high-mixed" was, perhaps, a little drier than that of the two cars in question, but that the line drawn by the inspection department was a fanciful line, and that there was not enough difference in the condition of the grain graded as "high-mixed" and "new-mixed" to justify the department in making the difference in grading. The inspection of Buckley, track inspector, having been sustained by Chief Inspector Reynolds and Second Assistant Supervisor Link, I asked Mr. Hayde if he wished to call the committee of Appeals. He answered that he would never call the Appeals committee while it was as at present constituted. I then gave notice that I would call the committee on the cars complained of, and asked Mr. Link to give notice at the central office of the appeal, and to request the committee to stop at my office on their way to the Illinois Central track. With the committee, I went to the cars at about three o'clock in the afternoon. On reaching the cars, I requested Mr. Buckingham, proprietor of the elevator, his foreman, our third assistant inspector at that elevator, Mr. Taylor and Mr. Buckley's helper, to witness the re-inspection by the committee. Fully three-quarters of an hour were used in making the re-inspection. When the committee was through with the examination, I requested each member to give me, without the knowledge of his fellow-members, his views of the grading of the cars. On one of the cars, all three of the members of the committee sustained the inspection, and on the other, two members voted to sustain the inspection, and one to grade it as "high-mixed;" thus the inspection on both cars was sustained. During the investigation of the cars in question, I stated to those present that Mr. Hayde, when examining the grain with Reynolds and Link, ventured the assertion that a shipper sending out grain at the present time would, as a matter of choice, select the grain in the two cars, had it passed as "high-mixed," in preference to corn then in the elevator graded as "high-mixed" and inspected in during the winter months, when, as he claimed, it was in a frozen condition

with more or less of snow or ice in the grain. The proposition gave rise to an animated discussion, some of those present sustaining the position of Mr. Hayde, and others controverting it. If this was so—if there was really no difference between the corn that had been graded in as "high-mixed" and the grain then being graded in as "new high-mixed"; so, if there was any difference, it was in favor of the corn then being graded in as "new high-mixed"—I resolved to know the fact, and concluded to put the inspectors to a test. I requested Mr. Buckingham to procure samples of "high-mixed" corn, which had been inspected into the elevator during the winter, when, as claimed, it was in a frozen condition, with snow and ice on the grain, and of same grade inspected into the elevator during the last two weeks, and I then took a sample from the car which the Appeals committee all agreed was properly graded as "new high-mixed," and taking the then sample thus selected, I went into the track inspection office in company with Buckley's helper, when he changed the samples into different buckets, on which I made private marks so as to distinguish the different samples. I then took the buckets out on to a seat in the shade of the inspection office and requested Mr. Buckley to examine the samples and tell me "which was which." He quickly examined them, and privately indicated to me the buckets which, in his judgment, contained the different samples, and he was correct in each case. I then requested the members of the Appeals committee to make the same examination, and each one made the correct selection. I then requested the foreman of the elevator to make a like examination, which he at first declined to do, but, as he had been very free in his suggestions and criticisms, I said to Mr. Buckingham that in all fairness his foreman ought to be subjected to the same test. Mr. Buckingham then directed his foreman to make an examination of the samples, which he did, and he also correctly selected the different samples. Mr. Buckley, and the members of the Appeals committee, giving as a reason for deciding that there was difference between the samples submitted to them, said that the corn taken from the elevator was in a drier condition than the samples of corn in the two cars graded as "new high-mixed."

INTERROGATIONS OF MR. HAYDE TO MR. BOGUE.

Q. Did Mr. E. Buckingham take a sample of the corn in car No. 780 to you on the morning of Monday, the 14th day of April, and inform you that that grain was unjustly graded?

A. Mr. Buckingham did bring to my office a bag containing sample of corn, which he said was being inspected by Buckley, the track inspector, as "new high mixed," which he felt ought to be graded as "high mixed," he did not mention number of car, name, nor did he state that the appeals committee had been called on car. I told him that I would look into the matter. I took the sample, of corn with me that morning to the inspection office, and asked Mr. Reynolds to direct Mr. Link to procure samples of corn from the Illinois Central Elevator of "high mixed" and "No. 2," and have them at Mr. Reynolds' office the next day at noon, so that we could consider the matter when Link and Parker would both be at the office. The next morning I read in the papers the account of Mr. Hayde's trouble and the shipment of the car to Springfield, when it occurred to me that perhaps this was the car of which Mr. Buckingham had furnished me the sample. I asked Mr. B., that day if such was the fact, when he informed me it was, and I remarked to him that as the appeal had been made to a higher authority, I did not see as we could press the investigation which I had resolved on.

Q. Did Mr. Reynolds inform you that I called at his office that morning, and gave him a full statement in reference to what had been done to car No. 780, and requested him as there were other cars of the same corn standing on the elevator track, that the appeals committee had not passed on to have Mr. Reynolds, and his assistants, Parker and Link, come with me and examine the same.

A. No, sir. I never heard of your trouble with the inspection until I saw an account of it in the papers on Tuesday.

Q. Under the circumstances, and considering the importance of the interests involved, would it not have been Mr. Reynolds' duty to have informed you of the communication I had made to you?

A. I think he might, but I think you are unfair in propounding these questions at this time when Mr. Reynolds is absent, he having been present last night and during the morning when I think he should have been questioned as to his own action.

Q. Are you not aware of the fact, that in the testimony taken last night and this morning, there was no evidence introduced to bring out this statement of mine in reference to Mr. Reynolds, until it is called forth by your testimony at this time?

A. I am aware of the fact that no such testimony was introduced last night but it was introduced by my evidence given before the adjournment this morning, while Mr. Reynolds was yet present.

Q. Are you not also aware of the fact that when you had completed your testimony this morning, the committee before whom we sat had important interests to attend to in the House, and adjourned their meeting without giving me an opportunity to cross-examine you at that time?

A. When I had completed my statement and it was suggested that it should be reduced to writing so as to appear as a part of the minutes of this committee, and you were about to cross-question me, it was suggested by a member of the committee that Mr. Hayde, could hardly question me in justice to himself till my statement had been reduced to writing and submitted to the committee, when an adjournment to four o'clock was suggested in which you acquiesced, and at which time Mr. Reynolds was excused from further service before this committee.

Q. Did I not inform you in the presence of Mr. Smith and Mr. Oberly, of my making that statement to Mr. Reynolds in reference to car No. 780 and if so, why did not you bring the matter up while Mr. Reynolds was present?

A. In a general conversation on the subject of car No. 780, you did say that you had called Mr. Reynolds' attention to the injustice, as you felt had in the inspection of car No. 780; I did not call the question up this morning, as I neither thought of it nor felt compelled to do so.

Q. In reference to the sample that you speak of, as having drawn out of the elevator to compare with the grain that I held on track, was it not taken from one bin, a small bucketful, and as a matter of fact could not be a fair or average sample of the corn then in store?

A. The samples furnished were drawn by the foreman of the elevator, and I was bound to accept it as a fair sample of the grade which it represented.

Q. In view of the testimony given last night by Inspector Buckley, that a six thousand bushel bin of "No. 2," corn had been shut off in the central elevator, Friday, April 25, for being soft and damp, was I not justified in stating that a shipper would prefer fresh shelled "new high mixed" corn to winter shelled "No. 2," or "high mixed"?

A. To answer that question, it would be necessary to enter into the discussion of a question which occupied the attention of this committee till near 12 o'clock last night, which I am not disposed to go into, and the evidence which I have submitted in writing to the committee gives a succinct account of a test made immediately after you had made the statement, which I think showed my disposition to thoroughly investigate the question when first brought to my attention.

Q. When I called on you on Monday, the 21st inst., was it not with a letter of introduction from Mr. Oberly containing a request that you would send one of the inspectors to Belleflower, where the corn was being shelled and loaded, and see if anything wrong could be discovered there with the grain?

A. Yes sir, you did call with a letter of introduction from Commissioner Oberly, containing some such suggestions and in the afternoon when you called at my office and I told you the action had by the appeals committee and the test which I had put the inspector and appeals committee too, I told you that I was ready then to agree about carrying out the suggestions contained in Commissioner Oberly's letter, you replied that your corn was so nearly all in, that it was not worth while at that time to make any such move.

Q. Do you recollect of any other instance during your connection with the grain inspection at Chicago, where the committee of appeals had been called by the inspection department to sustain their inspection, before it was done with the grain that I now represent?

A. I don't recollect ever before of just such action as has been had in this case.

STATEMENT BY MR. BOGUE.

The receipts by canal for the season of 1878, were 5,749,732 bushels of corn, which as I understand were over 1,000,000 bushels larger than ever received by the canal before. The corn was graded as follows: 977,151 bushels "high mixed", 4,188,638 bushels "No. 2" 82,200 bushels "new high mixed," 144,000 bushels "new mixed," 325,300 bushels "rejected," 32,445 bushels "unmerchantable."

Mr. Bogue's Interrogatories to Mr. Hayde:

Q. How many years were you on the inspection force in Chicago?

A. I went on in the fall of '63 and remained until Sept. '74.

Q. What position did you occupy while connected with the inspection department?

A. For 2 or 3 years I was Warehouse Inspector, during the remainder of my term I was a shipping inspector.

Q. You were never a second assistant inspector?

A. No, sir, except temporarily.

Q. During the time that you were connected with the force, you were never stationed except temporarily, for a short time, determining the grade of grain?

A. No, sir.

(Mr. Hayde's summing up testimony.)

MR. CHAIRMAN: After hearing the testimony of the several witnesses who testified in this case before your committee, I will briefly sum up a few of the facts proven and submit them as my final statement in the case. On my arrival in Chicago, Saturday, April 12, I learned by reference to Illinois Central Elevator books, that 67 car loads of Messrs. Halliday Bros. corn had been received between the 1st and 12th of April, and was graded as follows:

27 cars, new high mixed.
1 car, new mixed.
7 cars, rejected corn.
23 cars, high mixed.
9 cars, No. 2.

Believing, that 35 cars of this corn had been unjustly graded, and knowing that my employers would sustain a loss by reason of such erroneous grading, the more especially as only about one-half of this Belleflower corn was comprised in the 67 cars already received, and that the balance, on being shipped, would probably grade as indifferently as the first lot had done. I called the committee on appeals on car 780, the corn in that car being a fair average of the whole lot; two of the committee, Mr. Dater and Mr. Seymour, sustained the inspectors, and Mr. Foss was in favor of grading the corn "high mixed."

On Monday morning April 14, I had Mr. E. Buckingham, to whom the corn was consigned, take a sample of car No. 780, to Mr. Bogue, of the warehouse commission, and I called myself on chief inspector Reynolds and gave him my reason for believing the corn to be unjustly graded and requested that he would go himself, and his assistants, Link and Porter, and examine some cars of the corn, then on elevator track, that the committee of appeals had not passed on, and satisfy himself whether the corn was justly or unjustly graded. Mr. Reynolds refused to do so. Not knowing of any other source where I could apply for justice in the matter, I shipped car No. 780 on the night of April 14th, from Chicago to Springfield, with a view of calling the attention of the committee on warehouses in both branches of the legislature to the corn and see if a change in the grading could not be secured in that way. On coming here I was informed that it would be necessary to get a special committee appointed to examine the grain, and by a resolution of the House your honorable committee was appointed. After your committee

examined the corn on Wednesday, April 16, car No. 780 remained in this city until Friday morning April 18, when it was taken to the station at Chestnut, transferred to car No. 3,048, and shipped to Chicago in the name of I. J. Wobner, and was graded as "high mixed" corn. Saturday morning, April 19, sworn proof of the transfer of which I herewith submit.

Now, Mr. Chairman, I will ask the attention of your committee to the statement made by Mr. Buckley, Mr. Dater, and Mr. Seymour, in their testimony, last evening. Those gentlemen informed you that the corn in car No. 780 was below a "line" car, and was too green and soft to grade; Mr. Seymour going so far as to say that the corn should be left on the stem two or three weeks, before it would be in a condition to grade. In the face of this expert testimony, and as a matter of fact, the corn in car No. 780, after being brought here and examined, was transferred to car No. 3,048, and, on reshipment to Chicago, graded as "high mixed."

I will leave your committee to determine if the corn would grade, if submitted on its return to Chicago, to the gentlemanly committee on Appeals.

You have heard Mr. R. E. Moreland's statement, in regard to his buying, in large lots, 33,000 bushels of the corn, in November and December last; his cribbing the same in 10-foot wide bins, well covered, and running north and south; his further statement, that it was all shelled in dry weather, and was sound, dry and even throughout; and that he could not see, after eight years' experience in the business, any just reason for the inspectors cutting up into so many grades.

I have also, Mr. Chairman, given you a transcript from the inspectors' books, of the grading of fifty-two cars of this corn, between the 14th and 28th of April, or since I had car No. 780 brought before your notice; and although Mr. Seymour, as an expert, informed you last evening that the corn should be given two or three weeks on the stem, yet forty-three out of fifty-two cars graded, and two of the remaining nine, were shipped as "rejected," being partly culled from Mr. Pumpilly's whole lot of 25,000 bushels, and reserved for the last shipment.

In reference to Mr. Bogue's statement, that I asserted, as a shipper, I would prefer the Messrs. Halliday Bro.'s corn, that was being graded "new" and "rejected," to the winter-shelled "No. 2" and "high mixed" corn now in store in the elevators, Mr. Buckley's testimony fully sustains my views, by informing you that a 6,000 bushel bin of "No. 2" corn was shut off in Central Elevators, on the 25th inst., for being soft and damp. The fact is, any experienced shipper would prefer fresh-shelled corn to winter-shelled, at this season of the year.

Hon. William A. James, Speaker of the House of Representatives of the Thirty-first General Assembly:

SIR: The minority of the committee to which was referred the complaint of Mr. J. Hayde, in regard to the manner of inspecting grain, and especially the inspection of car No. 780, begs leave to report that the present system of inspection was clearly shown to be very defective.

This particular car, No. 780, was shipped to Chicago, and was inspected "new high mixed;" the reason given for such inspection being, that the corn was "soft." The car, after being shipped to Springfield and loaded into another car, was again sent to Chicago—all within five days—and inspected "high mixed;" which means *dry and sound*. It is a well known fact, that corn, after being shelled during the germinating season, is apt to sweat, and in place of drying out, in five days, would be much softer, and in a worse condition than when first shelled.

The testimony of the track inspector was, that the means used to determine the dryness of corn was to smell it; showing that a great deal depends upon the sanitary condition of the smelling apparatus of the inspector. The Appeals committee have no other means of determining the grade than has the inspector, and from their own testimony it will be seen, that in considering an appeal, they simply give a guess; having before them the judgment of the track inspector, who is constantly employed in inspecting grain, and whose judgment must be far more reliable than that of any Appeals committee, a majority of whose members, are not constantly handling grain, but, on the contrary, are simply dealers in "puts," "calls," "longs," "shorts," and "options;" generally, not seeing a grain of corn, unless they are called upon to pass upon an appeal.

It is the opinion of the undersigned that this useless Appeals committee ought to be dispensed with, for the reason that they are not, neither can they be, as competent to decide the grades of grain as the track inspector, who makes it an every-day business.

Another serious fault with the manner of inspection may be mentioned. It was shown that when grain comes out of the elevators in good condition, the track inspection is made liberal; when on the contrary, it comes out in bad condition, the inspection of grain coming in on the tracks is very rigid, and the consequence is, that grain is not inspected on its own merits, but the condition of grain in the elevators governs to a great extent, the track inspection greatly to the detriment of the producers, but largely to the profit of elevator men. It seems to the undersigned that there ought to be established a well defined rule in regard to the grading of grain, when the judgment of the track inspector is appealed from, that the appeals committee ought to have a sure process of testing the condition in regard to dryness (the color and soundness being capable of ocular demonstration) and not be forced to rely upon the smelling capacities of a majority, which, of course, have not received the cultivation as those of the track inspector. My own experience is that the amount of water contained in grain may be easily and cheaply determined by evaporation, and I would suggest that the Board of Railroad and Warehouse Commissioners should fix the amount of water that "No. 2" grain might safely contain, and then if an appeal is taken on cars that do not grade, a sample might be evaporated. If the sample contains less water than the amount fixed for "No. 2," then it should grade; if it should contain more water, it ought not to grade. This means of testing the grade would be sure and reliable and might be done in the office of the inspector at less than one-twentieth of the cost of appeals under the present system.

[Signed]

C. FOSBENDER.

Mr. Cockle, from the committee on river and canal improvement, made the following report:

Hon. W. A. James, Speaker of the House of Representatives of the 31st General Assembly:

SIR: The canal and river improvement committee, to whom was referred the following resolution:

WHEREAS, It is currently reported in the public press and otherwise, that the title to possession and uses of the wharfs on the banks of the Illinois and Michigan Canal (property of great value) in the city of Chicago, has passed from the control of said canal and its commissioners so that wharfage tolls are charged and collected by private parties for private uses; therefore

Resolved, That the committee on canals and rivers is hereby instructed to thoroughly and fully inquire into and ascertain and report to this House in detail, as soon as practicable, who have possession of and occupy the wharfs on the banks of said canal in the city of Chicago, how and when such possession was obtained, of whom, what and the amount or amounts, if money, was paid for it, and to whom; and that said committee is hereby delegated with all the powers necessary to send for persons and papers, administer oaths and examine witnesses, to the end that said examination may be full and complete.

Beg leave to report that the lots along the main and north and south branches of the Chicago river, from State street to Madison street along the main and south branches and up the north branch to Kinzie street, are commonly known as wharfage lots.

That on the plat of the original town of Chicago there is a vacant space of land ninety feet wide left along the margin of these rivers outside of the streets and the canal commissioners who caused the plat to be made and who certified to the same and which was recorded, stated "*that this land was so left for the public use along the rivers.*"

Your committee further report that in all the acts passed by the General Assembly of this State granting to the town and now city of Chicago any rights and privileges touching lands and lots the right of the State to the wharfage privileges referred to have been invariably reserved, as will be seen by reference to the several acts, copies of which are herewith annexed and made part of this report.

Your committee further report that the enlargement and changes made in the canal in Chicago, from time to time make it necessary that a very careful survey be made to show how much and what portion of the wharfage lots and strip of land aforesaid have been taken for the purpose of enlarging and otherwise improving the canal.

Your committee have been unable to ascertain under what claim of title the said wharfage lots and lands are held by the parties now in possession of or claiming the same, but your committee believe that the title to the same has never been conveyed by the State or the canal commissioners.

Your committee therefore recommend that in view of the great value of the land and lots in question; and the doubts hanging over the title, that the canal commissioner under the advice of the Attorney General take such steps as may be necessary to ascertain whether or not the State has ever conveyed or granted its title to the premises referred to, and if not, that the canal commissioners be instructed to take such steps as may be necessary to recover possession of the said lands and lots.

W. COCKLE,
Chairman of committee of canal and river improvement,
